The 7th NUF course on LUTD and urodynamics

PROGRAM

BLADDER OUTLET OBSTRUCTION – TO THE NEXT LEVEL

Urodynamics – when and how (diagnostics of BOO)

Basic urodynamics

Invasive urodynamics – always before treatment decisions?

Special investigations: Voiding cystourethrogram, videourodynamics

Invasive tests and antibiotics

Panel discussions: Cases and decision making

BPO – benign prostatic obstruction

Diagnostics and primary considerations – beware of the pitfalls!

BPO diagnostics – anything special to consider?

BPO and OAB – what to do? Chicken or the egg?

Medical treatment of BPO

BPO and neurological disease – do we need to be extra vigilant?

Surgical treatment of BPO

Endoscopic/mini-invasive methods

Prostate artery embolization

Robotic assisted simple prostatectomy

Transvesical/open simple prostatectomy

Panel discussion: Which surgery for which patient?

BOO – the next level

Devastated outlet –VUAS, BNC

Urethral stricture, diverticula, syringocele in men

Optilume – for whom?

BOO in women: urethral stricture, diverticula

Voiding dysfunction in women: Be aware of rare diagnoses

Pelvic floor dysfunction, dysfunctional voiding, pain (men & women)

Pudendal nerve entrapment – a cause of BOO?

The role of the physiotherapist

Sacral neuromodulation for urinary retention – does it work?
